Letter to our residents

I'd like to take this opportunity to introduce to you, Enradd. (Electronic Non RADar Device)

Over my 30 years of service to this community and now as your Chief of Police one issue has remained a constant; on a weekly basis, our residents call and voice concerns regarding speeding vehicles on our roads and more importantly on our residential streets.

Until now we have relied on stop watches to time vehicles between painted white lines on the road surface. Recently we purchased and took possession of our ENRADD unit and will begin deploying it throughout the Township. Four officers have been certified as trainers and will train the remainder of our department in its use.

Enradd is wireless speed timing equipment that will allow us to move from site to site as motorist become aware of the system location. The result will be an increase in speed monitors and unfortunately for some, citations for excessive speed. No longer will we be tied to those "white lines." Enradd provides us with the capability of monitoring vehicle speeds up to a quarter mile from our vehicle position.

I have enclosed a picture of our Enradd unit for reference.

It is our intent to become pro-active with these speed issues on our roadway combining Enradd with marked, unmarked and unconventional vehicles.

In addition I have proposed the purchase of a mini radar trailer. This will afford us the opportunity of moving this unit into our residential areas on a weekly basis to assist with speed issues. In addition it will allow for the collection of Data to better deploy our officers.

As always; speed issues on our roads and especially our residential streets is a "Catch 22" situation. Please obey the posted speed limits so we don't catch you.

Professionally,

Jeffrey J. Falconer  
Chief of Police  
North Fayette Township
